## CUSTOM APPLICATION CASE STUDY “COURIER & TRANSPORTATION MANAGEMENT”

### Premise

Based out of the United Kingdom, this logistics and transportation company needed a break from spreadsheets, which consumed a lot of time.

### Research & Insight

We integrated the upstream, storage and downstream processes of managing logistics and provided a unified interface which eliminated the need for routine administrative bookwork .

### Solution

Along with truck loads of time saved, the management also got a bird's eye view of the overall performance of their company. From receiving orders to assigning jobs and from tracing drivers to delivery proofs. All of this at a super affordable price.
